

Dear Parents,

The following assessments will be used to determine placement of students into accelerated math for the 2020-2021 school year. We use *local percentiles* from these assessments in our placement process.

- Cognitive Abilities Test (CogAT, December)
- Fall MAP Score
- Winter MAP Score

You will be notified of your child's math placement when you receive their schedule in August.

All 6th grade math teachers differentiate instruction and work with the 6th grade math specialist to ensure that students reach their maximum potential. Students who do not place into accelerated math during 6th grade will have an opportunity to place into 7th Grade accelerated math during the 2021-2022 school. Additionally, students who don't place into 6th grade accelerated math will still have an opportunity to place into New Trier Math.

Sincerely,

Susie Carlson

6th Grade Level Administrator
